

Hand Position: Begin by using an okay handshape

Like the flight of a bee: Place your index finger and thumb so the points are touching, trace a winding path in the air upwards

Jellyfish have long flowing tentacles behind them:

One hand raised, fingers splayed out facing downwards. As you move your hand and arm up, slowly open and close your fingers, floating along as if in water.

Kk

Think hopping like a kangaroo:

Use both hands to hop, cupped hands, fingers together. Perform an arc with both hands, keeping hands pointed down, repeat twice
